

# The N-able Advantage

Security

Business Growth

Innovation

## N-ABLE™ RMM

A cloud-based remote monitoring and management (RMM) dashboard designed to help efficiently secure, maintain, and improve your IT management via a single pane of glass.

## N-ABLE N-CENTRAL®

A highly configurable remote monitoring and management platform that offers on-premises and hosted options, designed for managed service providers who require more customization for complex environments.

## N-ABLE BACKUP

A cloud-first data protection service that lets you manage server, workstation, document, and Microsoft 365™ backups from a single dashboard. Backup storage in our global cloud is included.

## N-ABLE MSP MANAGER

An agile, versatile, cloud-based service-management and help-desk solution designed to offer an easy way to manage and optimize your IT service business.

## N-ABLE MAIL ASSURE

An easy-to-use cloud-based email filtering and archive solution designed to help make business email secure and available for your clients.

## N-ABLE RISK INTELLIGENCE

A powerful, easy-to-deploy, cloud-based software system designed to help identify at-risk data in your managed networks and quantify it in terms of the potential financial impact of a breach.

## N-ABLE TAKE CONTROL

A fast, easy-to-use remote access tool designed to help you fix issues remotely and collaborate easily with other technicians.

## N-ABLE PASSPORTAL™ + DOCUMENTATION MANAGER

An automated password protection solution designed for MSPs to store, manage, and retrieve customer credentials and privileged client knowledge.

## N-ABLE ENDPOINT DETECTION & RESPONSE (EDR)

Prevents, detects, and responds to ever-changing threats—and recovers quickly when ransomware or other exploits strike.

All products are built from the collective intelligence of

22,000  
Businesses

500,000  
Networks

6,300,000  
Endpoints

1,800,000  
Mailboxes

## RMM and N-Central: Features at a glance

Both cloud and on-premises RMM software were built to drive efficiency and grow your IT services business.

✓	Managed Antivirus	A full-featured anti-malware feature designed to be easily deployed and managed.
✓	Patch Management	Help manage Windows® and third-party updates across your customer base and help leverage powerful automation.
✓	Web Protection	Help protect users from visiting malicious websites that could harm your network and devices.
✓	Remote Monitoring	Help monitor the health and availability of your customers' devices and applications from a unified dashboard.
✓	Active Discovery	Designed for automatic identification and management of new devices as they come onto the network.
✓	Automation and Scripting	Create scripts to help automate routine tasks using a drag-and-drop interface designed for simplicity—no need to learn a scripting language or write a line of code.
✓	Backup and Recovery	A cloud-first backup solution designed to help you back up quickly and reliably with optional local storage for speed—leveraging the cloud for security and availability.
✓	Mobile Device Management	Help monitor, maintain, and keep track of company- and employee-owned mobile devices.
✓	Remote Access	Help resolve tickets fast by repairing workstations and servers without leaving your desk.
✓	Reporting	Create robust customer-facing reports that help drive IT strategy and help prove the value of your services.
✓	Real-Time Architecture	Benefit from an ultra-responsive, near-real time monitoring platform designed for faster, more proactive service.
✓	Cross-Platform Support	Help deliver high levels of service to your Windows, Mac® and Linux® user communities.

✓	Risk Intelligence	Identify sensitive, hard-to-find personal data in a network and help calculate the potential cost of a data breach.
✓	Email Security	Leverage an email security solution designed to help provide robust email protection, cloud-based email continuity, and long-term email archiving at a strong price.
✓	Cloud/SaaS Model with On-Premises Options	SaaS and on-premises software solutions designed to fit your needs, whether it's managing from the cloud or your own infrastructure.
✓	Endpoint Detection and Response	Get an endpoint protection solution designed to prevent, detect, and respond to ever-changing threats—and recover quickly when ransomware or other exploits strike.
✓	Password and Documentation Management	Help boost security with automated password management designed to protect your team's user credentials and offer quick access to customer knowledge and documentation.

## About N-able

N-able empowers managed services providers (MSPs) to help small and medium enterprises navigate the digital evolution. With a flexible technology platform and powerful integrations, we make it easy for MSPs to monitor, manage, and protect their end customer systems, data, and networks. Our growing portfolio of security, automation, and backup and recovery solutions is built for IT services management professionals. N-able simplifies complex ecosystems and enables customers to solve their most pressing challenges. We provide extensive, proactive support—through enriching partner programs, hands-on training, and growth resources—to help MSPs deliver exceptional value and achieve success at scale.
