

## Data Loss Prevention and Insider Risk Management Solution

www.safetica.com

## **Safetica** stops data breaches and protects companies against insider risks.

Safetica's unified approach protects sensitive data by integrating proactive measures to prevent unauthorized data exposure with user-based strategies to detect, analyze, and mitigate risks posed by insider threats within an organization.

# Safetica covers today's most critical data security scenarios

### Gain data visibility and discover sensitive data

Safetica helps you to discover and classify valuable data using its unique Safetica Unified Classification which combines analysis of file content, file origin and file properties. It offers complete visibility and continuous monitoring, never missing a beat to instantly identify, classify, and track sensitive data.

### Protect sensitive and business-critical data

With Safetica, you can protect sensitive business- or customer-related data, source codes, or blueprints from accidental or intentional leakage. It audits all sensitive data activities no matter where the data moves, so you can report and investigate where there's a risk of leakage or theft. These findings are key for data protection.

### Prevent insider risks and promote security awareness

Anyone can make a mistake which could put your business at risk. With Safetica, you can analyze insider risks, detect threats, and mitigate them swiftly. Notifications about how to treat sensitive data can help raise awareness around data security and educate your users.

### Maintain data security for remote work

Safetica provides the full range of capabilities, including data protection, complete contextual visibility, and incident-driven training, regardless of location or network status. Get your hybrid digital work environment under control, discover unwanted software and services, analyze behavior to detect and audit high-risk users.

### Detect and mitigate regulatory compliance violations

Safetica helps you to detect, prevent, and mitigate regulatory violations. Its audit capabilities support incident investigation to comply with regulations and data protection standards like GDPR, HIPAA, SOX, PCI-DSS, GLBA, ISO/IEC 27001, or CCPA.

## **How It Works**

monitor data transfers and user actions to detect any risky behavior. All configuration settings, user and device records can be accessed and managed via the web-based Safetica Console. Protect sensitive data both on endpoints and in the cloud with policies and rules. Enforce guidelines for handling data and enable actions such as blocking or alerting for policy violations. Generate alerts, notify security teams, investigate incidents, and initiate response protocols to mitigate impact and prevent data loss or exposure.

### Data channels covered

Safetica keeps data protected across a multitude of channels and platforms, ensuring your data is secure wherever it flows.

# Safetica Essentials Key Benefits

Safetica Essentials audits and classifies all data flows in your organization. It identifies sensitive information and data security risks using content inspection and context awareness. Get a quick overview of what is happening in your work environment in real-time. Better understand all internal activities, processes and data risks to enhance your data security and internal efficiency.

Get insight into data security incidents and regulatory compliance violations to be able to respond and mitigate their impacts

Discover and classify your sensitive data flows in any channel or activity to find out where your data is at risk of loss or theft

Get instant actionable notifications with easyto-read risk evaluation and incident overview

Get general information about user activities to discover shadow IT – unwanted or unnecessary software, cloud services, devices and peripherals

### Safetica Console

Web-based central management console that offers optimized features and seamless user experience:

- Data flow visibility, user activity visibility across email, applications, websites and external devices
- Protected device maintenance, interactive reporting, and data analysis
- Real-time alerts and incident investigation

### Data protection starts with data visibility

Identify how company data is used and where the data flow.

- Full Windows and macOS support
- Content inspection and context-aware classification with out-of-box templates
- Data security incident detection
- Easy to upgrade to the full-featured data security platform

# Safetica Pro Key Benefits

Safetica Pro identifies risks, prevents human errors and malicious acts, and educates users to protect your data. The combination of data analytics, data classification, and data loss prevention (DLP) with insider risk management creates a secure environment and supports efficient business operations.

Have full control over sensitive data flows and internal risks based on user behavior and complete content and context analysis

Protect data seamlessly across diverse data storage platforms including clouds, network shares, and Windows & macOS endpoints Reduce risk and ensure compliance with real-time incident-based user training

### Get your data under control, online and offline

Unmatched data visibility across all endpoints, networks, and cloud environments for complete data protection and threat prevention. Safetica uses advanced content classification and OCR for sensitive data detection in image files and scanned documents.

### Set clear policies for all users and data channels

Set up policies for specific groups or individuals. Select the desired workflow with configurable actions from silent auditing, through user notifications to strict blocking.

# Built to address the risks of today's work environment

- Safetica Unified Classification enables content- and context-based approaches
- Pre-defined templates and custom policies
- Flexible DLP actions: record only, notify, justify, or block
- Real-time email notifications
- Multiple hosting options

### Detect potential threats and analyze internal risks

Respond to threats even before a major incident happens thanks to early discovery of behavior anomalies and data flow risks in your organization.

#### Empower users to work with sensitive data

Display educational notifications to users when there's a risk of policy violation to let them know or decide. Enforce specific processes to protect the most valuable data.

The Safetica Console enables detailed but easy configuration of data classifications, policies, or reports.

# UEBA Key Benefits

Knowledge is the first and most important step in understanding your company's workflow, users work habits and productivity. Enrich Safetica product with User and Entity Behavior Analytics add-on to see user activities in detail and uncover their behavior anomalies. Ensure smooth business operations, even when working remotely.

# ça

#### **Recognize undesirable user activities**

with work activity audit and automated categories for apps used and websites visited by specific users

# ព

**Track changes in user behavior** with detailed overview of user behavior in your organization over time

### Get deeper insights into email communication with records of all incoming and outgoing emails with

respect to user privacy

### Get comprehensive overview and real-time alerts about individual user activities, even when working remote, such as via remote desktop etc.

### **Detect underlying reasons for anomalies**

Dig deeper and pinpoint troublesome elements in your environment to address security or business efficiency concerns. Analyze work-related activities of individual users with detailed information. Find out if anyone visits dangerous websites or uses undesirable applications and services.

### Maintain transparency in work, even when working remotely

Let top management and department leaders see how their individual reports work. Stay on top of things even when your users work from home or on the go. Prevent security risks and manage users' efficiency by identifying idle workers, and suspicious behavior patterns.

S

## Cloud Data Protection Key Benefits

Protect your data in the cloud and prevent any unauthorized access or leaks to cloud storage. Secure emailing and file-sharing, safeguard data, and maximize the value of your cloud investment with a dedicated security solution for Microsoft 365.

### Safetica extends data security to the cloud

Monitor and conduct audits of file uploads and downloads to cloud storage platforms

Safetica can monitor and classify files directly during user operations, such as exports, uploads and downloads, opening files, copying files to a different path, uploading files via web browsers, sending files via email or IM apps, and others.

Take real-time action to protect data and educate users

Safetica's flexible protection policies:

- Prevent sensitive data from being stolen or lost
- Inform and instruct users to improve security
   awareness
- Enable override with a valid justification

### **Safeguard Remote and Mobile Work** with Microsoft 365 Anywhere, Anytime

- Protect, audit, and control access to any data file as you collaborate in Microsoft 365, no matter where the document is stored or who it's shared with.
- Fully leverage the potential of Microsoft 365 cloud applications (OneDrive, Outlook, SharePoint and Teams) on mobile devices
- Automatically apply controls, even when user devices are not within the organization's network.

**90** security evangelists who we are

**Safetica** is a global software company that provides Data Loss Prevention and Insider Risk Management solutions to organizations of all shapes and sizes. Here at Safetica, we believe everyone deserves to know that their data is safe.
