WHY D-LINK?

Why D-Link?

D-Link has been the brand of choice for millions of customers since way back in 1986. Back, in fact, since the Internet was in its infancy. We have grown with it, led the trends and continuously developed leading-edge products that reflect the needs and demands of real people in the real world, whether at work or at home.

With over 37 years in the industry, D-Link has both the resources and expertise needed to pioneer technological trends through ongoing research and development programmes. All this translates into affordable, market-leading products that make your business or personal life easier.

For Home

There's no avoiding it – we now live in a digital world, a world in which we want all our devices to talk to each other, to seamlessly integrate without the need for human intervention or continual techy tinkering. We want to stream music throughout our homes, ask Siri or Alexa what the weather will be like, visually monitor our babies or pets, download HD movies, share photos, play games and, of course, check our emails and browse the web.

All this needs modern, technologically advanced products that seamlessly integrate into our lives. And D-Link provides it all. Whether you need the latest Wi-Fi 6 router, a state-of-the-art network camera, smart plug, Wi-Fi range extender or a 5G hotspot, there's a D-Link product to suit.

For Business

From a business user perspective, D-Link has the scale, the resources, the experience and the expertise that the world's most demanding businesses look for. We make sure we stay really close to our customers' businesses and then, because our R&D resources are geared to fast-track product development, we provide them with early access to the most advanced solutions possible.

D-Link's switching, industrial Ethernet, wireless, security, and network management solutions deliver best-in-class performance. We offer standardised technology with industry-leading functionality integrated into highly flexible, highly reliable and highly secure solutions that are easy to implement, at a price you can afford.

Many of our business products come with a Limited Lifetime Warranty to reflect our commitment to provide even more quality, performance and value. Look for this logo to see which products are covered.

5G

Harness the power of 5G and experience multigigabit mobile internet speeds. 5G offers faster internet speeds with lower latency than most traditional copper and fibre networks.

With the freedom to deploy anywhere there is 5G coverage, businesses and homes can enjoy multigigabit internet, even in remote and rural locations. Enjoy streaming the latest movie in 4K around the house on multiple devices or use the latest Cloud/SaaS applications in a busy office.

The DWP-1010 is a **5G outdoor modem/router** designed to be mounted externally for the optimal 5G reception. Enjoy 5G download speeds of up to **4 Gbps** without the physical wires or fibres. Integrated **6 x 5G antennas** maximise reception, while the **2.5 Gigabit PoE port** minimises connection bottleneck and allows you to connect and power through a single cable.

Model	DWP-1010	DWR-978
Product name	5G/LTE Outdoor CPE	5G AC2600 Wi-Fi Router
Indoor/outdoor (IP-rating)	Outdoor (IP67)	Indoor
Mount	Wall and pole	Desktop
Wireless standard	(For installation and maintenance only)	Wave 2 Wireless AC2600
Wireless speed		800 Mbps 2.4 GHz 1732 Mbps 5 GHz
Dual-band		•
MU-MIMO		•
Guest Wi-Fi network		•
Wi-Fi Antennas	Internal	Internal
WPA3		•
4G/5G Antennas	Internal	Internal & detachable external
Type of WAN	5G NR Sub 6 GHz: n1/3/20/28/77/78 (D/L: 4 Gbps, U/L: 620 Mbps)	Gigabit Ethernet, 5G NR Sub 6 GHz: n1/3/20/28/78 (D/L: 1.6 Gbps, U/L: 150 Mbps)
4G/LTE fallback	•	•
Integrated SIM card slot	•	•
Wired LAN speed	2.5 Gigabit	Gigabit
Number of LAN ports	1	4
PoE	802.3at	
Fail-safe Internet		•
USB port		USB 2.0 x 1

People simply want things to work as they should, and network management is no exception. D-Link designed Nuclias to be a networking solution with a simple and user-orientated design, packed with rich features and functionality, designed to address the needs of everyone.

Simplicity

Nuclias Cloud allows any organisation with any level of IT resource to quickly and easily set up, configure, monitor, troubleshoot, and manage their network deployment remotely through a web browser, or the dedicated Nuclias tablet app.

Zero-Touch Deployment

Zero-touch deployment and reduced installation and configuration costs thanks to a centralised, profile-based cloud management system.

Hassle-Free Management

Nuclias Cloud is a turnkey solution with simple installation and management, designed to work even if the connection to the cloud is interrupted.

Unlimited Scalability

Suitable for small branch offices to large networks, Nuclias Cloud provides unlimited capacity and uncompromised throughput with its low in-band data management footprint.

Main features

- Zero-touch provisioning
- Role-based administration
- Auditable change logs
- Authentication via customisable captive portal, 802.1x and RADIUS server
- Social login for Wi-Fi access supported
- Advanced traffic report and data analysis
- Intuitive web-based interface with multilingual support
- Automatic monitoring and alerts
- Over-the-web firmware upgrades
- Searchable network-wide event log
- Intuitive VLAN Configuration
- Cloud based RF Optimisation

Nuclias Connect is the ideal centralised network management solution for SMB and SME networks. Nuclias Connect makes it easier to analyse, automate, configure, optimise, scale, and secure a network – delivering the convenience of an Enterprise-grade management solution, at an SMB price.

Free Software Download

Free to download software for Windows and Linux providing centralised management for a wide range of D-Link access points.

Self-Optimising Network

Nuclias Connect automatically adjusts access point transmission power to optimise coverage as well as self-heal in the event of device failure.

Local Management

Nuclias Connect can be installed on a local as well as privately hosted cloud server, meaning all the data is kept private. Alternatively, Nuclias Connect Hub* is a dedicated controller preloaded with the Nuclias Connect management software

Customisable

nuclias connect

Main features

- Free-to-Download Management Software
- License-Free Access Points
- Backwards-Compatibility
- Intuitive Interface
- Inexpensive Hardware Controller (Nuclias Connect Hub)
- Traffic Reporting & Analytics
- Remote Config & Batch Config
- Multi-Tenant & Role-based Administration
- Searchable & Auditable Event & Change Logs
- 802.1x and RADIUS Server, POP3, LDAP
- Multilingual Support
- Front-Desk Ticket Management
- Authentication and Payment Gateway (Paypal)
- Integration via Customisable Captive Portal

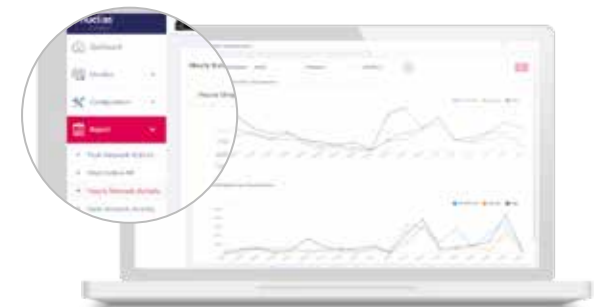

Nuclias Connect Hub

Flexibility to Meet Your Needs

- Free software download or dedicated Nuclias Connect Hub*
- Monitoring and remote management of wireless APs on your network
- Control & analytics of a broad or fine granularity, presentable in a variety of formats.
- Manage a variety of distributed deployments, including the option to configure settings and admin accounts in a specific manner for each deployment.
- Expand from a small network to a larger one (up to 1,000 APs)

Insights at a Glance

- Gain an extensive understanding of your network through usage analytics and status reports which can be viewed at a glance.
- Insights derived from traffic data can create business value.
- Traffic can be viewed across the entire network, to the level of a single AP.

NUCLIAS CLOUD

Complete cloud-managed networking solution for small to medium-sized organisations with one or more sites.

Wi-Fi coverage and network capacity are provided by high-performance Access Points and Managed Switches deployed on site, while configuration and ongoing management can be carried out remotely through a web browser or tablet. Zero-touch provisioning and centralised cloud-based control make the network simpler to install and easier to manage, without the need to have specialised equipment or personnel onsite. SSL encrypted, out-of-band network monitoring and management ensures secure connectivity whilst minimising bandwidth requirement.

Wave 2 Cloud-Managed Access Points

MODEL	DBA-1210P	DBA-2520P	DBA-2820P	DBA-3620P	DBA-3621P

BUSINESS WIRELESS

Managing Your Network

D-Link's network management options allow you to centrally manage and monitor multiple wireless access points and switches either within a local network or remotely. Furthermore with our Nuclias Cloud-Managed Networks, you can quickly and easily deploy and monitor unlimited number of devices through a simple pay as you grow subscription model.

Managed Wireless

	Nuclias Cloud	Nuclias Connect	Nuclias Connect Hub (DNH-100)	DWC-1000 (H/W vers. C1)	DWC-2000

mydlink

The smart way to protect and control your home

Keep an eye on your home while you're away, save money by controlling your power budget, set your lights to turn on when it gets dark.
Your home, only smarter.

- 1 Smart scheduling and automation
- 2 Cloud recording allows you to record video clips to off-site cloud storage
- 3 One-tap feature allows you to easily control multiple devices and bundle multiple actions into scenarios
- 4 Works with Amazon Alexa and Google Assistant voice control
- 5 Quick and easy setup with integrated Bluetooth

Protect Your Home with Smart AI-Based Detection

Person Detection

Multi-zone Motion Detection

Boundary-crossing Detection

Priority Zone

The Smart Full HD Wi-Fi Camera comes with free AI-based intelligent motion detection that helps you customise how alerts are triggered for smarter home monitoring

The 2K QHD Pan & Zoom Outdoor Wi-Fi Camera intelligently detects human and car shape objects and the sound of breaking glass.

FREE mydlink app with Cloud Recording

The mydlink app takes you to the heart of your smart home, so you can easily control, monitor, and automate every smart home device, wherever you are, whenever you connect to the app.

Control lights around your home without reaching for the switch. Save your home camera recordings straight to the cloud and enjoy your best memories. Turn everything off when you head to bed – mydlink takes the legwork out of your chores so you can spend time doing what you love.

EAGLE PRO AI SERIES

EAGLE PRO AI

Imagine Wi-Fi so clever that it adapts continuously to its surroundings and how you use your Wi-Fi, to provide faster and more stable connections to all your devices. You can mix and match to create an intelligent mesh Wi-Fi for seamless connectivity everywhere. It even intelligently monitors your network usage to give simple, actionable recommendations to keep your network at peak performance for everyone.

EAGLE PRO AI

EAGLE PRO AI App

AI Assistant

Proactive app provides notifications and usage reports to keep your Wi-Fi and network traffic optimal

Enhanced Parental Controls

Create profiles, set schedules, establish bedtime, block specific web domains, and pause the internet

AI Parental Controls

Assign devices to profiles to block websites, set schedules for access, and turn off Wi-Fi

AI Mesh Optimiser

Mesh nodes collaborate with each other to optimise network traffic

AI Wi-Fi Optimiser

Smart continuous channel monitoring gets you connected on the best channel available

AI Traffic Optimiser

Smart QoS keep your gaming, voice calls, video streaming, and downloads uninterrupted

WPA3 Security

The latest in wireless encryption to keep your network safe from unauthorised access

MU-MIMO & OFDMA

Perfect for 4K streaming, VR gaming, video calling and smart home devices

Voice Control with Google/Alexa

Control your network and devices in your home conveniently through a voice assistant

Clean Network

Compliant with IEC 62443-4-1 ensure your network stays safe

One Connection – Infinite Possibilities

* R15/M15/E15/G415/G416 can be combined to create a mesh network. R32/M32 can be combined to create a mesh network. R32/M32 can also be used to create a mesh network with R15/M15/E15 only when set up as master router.

EAGLE PRO AI SERIES

Fast, reliable Wi-Fi, wherever you are

Whether setting up Wi-Fi where there is slow or no fixed-line Internet, or wanting a super reliable connection with auto-failover, the 4G-enabled EAGLE PRO AI routers combine 4G+ download speeds of up to 300 Mbps with AI-powered Wi-Fi 6 to give you an incredible connection, wherever you are.

AQUILA PRO AI SERIES

Smart Wi-Fi, Smart Life

Experience the ultimate smart home networking solution with AQUILA PRO AI.

Ground-breaking industrial design combined with advanced AI-enabled capabilities to deliver whole home fast and reliable Wi-Fi.

AQUILA PRO AI App

Easy setup up and manage your home network with the AQUILA PRO AI App. Let AI Assistant monitor network performance and Parental Controls to keep kids safe online.

Seamless Coverage

Say goodbye to weak signal and dead zones with superior mesh Wi-Fi network covering every corner of your space.

Ultra-Fast Speed

Wi-Fi 6 speeds of up to 3,000 Mbps. Enjoy true 8K streaming, buffer-free gaming and smooth video calls simultaneously.

Stable Connectivity

Experience reliable wireless connection everywhere in your home with our AI Wi-Fi, Mesh, Traffic optimiser technology.

Available in Q4, 2023.
* M30 can only create mesh network with other M30 units.
